

SUMMARY

Full-stack software developer experienced in building responsive and user-centered web applications. Passionate about clean, maintainable code, accessible design, and improving user experiences.

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind

Backend: Node, Go, Python, C#

Data & Infrastructure: PostgreSQL, RESTful APIs, Docker, Google Cloud Platform

Other: Korean, Japanese

EXPERIENCE

Coding Mind - Instructor (Irvine & Diamond Bar, CA) Aug 2025 - Present

K-12 programming academy

- Taught students software development concepts using C# (Unity), Python, and Java
- Led project-based classes including AI-based projects

Kittenbean Studios - Co-Owner / Developer (Remote) Mar 2023 - Present

Indie game studio

- Built and deployed studio and game websites using React and GitHub Pages
- Shipped a free-to-play mobile game, [Feather Friends](#), using Unity and C#
- Implemented various game mechanics and systems for [Slime in a Trench Coat](#) with Godot and C#

The E.D.I.T - Research Intern (Remote) Oct 2022 - Mar 2023

AI and digital pathology research lab at Dartmouth College

- Built an interactive prototype for visualizing multimodal tissue data using Python Dash
- Developed an image co-registration pipeline for elemental imaging analysis
- Contributed to published research on spatial multimodal analysis (*TRACE* project)

Wildfire Systems, Inc. - Software Engineer (Remote) Oct 2021 - Jan 2022

E-commerce rewards company providing cashback and coupon solutions

- Optimized RESTful APIs connected to PostgreSQL databases using Go
 - Developed UI for internal tools and data dashboards using React and TypeScript
 - Worked in agile sprints, performing code reviews and deploying containerized services with Docker and GCP Kubernetes clusters
-

PROJECT HIGHLIGHTS

[Wind Map](#)

Dynamic WebGL app visualizing global balloon and wind data

- Fetched, processed, and smoothed live balloon position data to generate continuous trajectories
- Integrated NOAA wind datasets to render dynamic wind particles

[shop.yoob.space](#)

Full-stack e-commerce web app for custom stickers

- Built a responsive platform for custom stickers using Next.js, Tailwind CSS, and Firestore
 - Integrated Stripe checkout for secure payment processing and Cloudinary for product media
 - Created admin tools to streamline product management
 - Deployed on Google Cloud Run in Docker container
-

EDUCATION

LearningFuze - Full-Stack Web Development Bootcamp (2020)

University of Southern California - Math Coursework (2016-2018)
